Google Dictionary for Chrome is a browser extension that offers to remove any linguistic chaos that might want to surround you since it provides you with useful definitions for any word you may encounter in your online quests. Google Dictionary is a browser extension that brings closer to you an invaluable resource that should considerably improve your language skills. It is worth mentioning that it is not intrusive in any way and that it packs an "Options" section letting you easily configure its behavior. As for what the browser extension can do is prompt you with handy explanations for any word you may not know once you carry out a specific action. Clicking on the app's icon in the toolbar allows you to type in specific words you may be interested in, but its main functionality is related to how it can handle text you read online. Provides you with definitions for words you select or double-click Thus, Google Dictionary can open a pop-up bubble once you double-click or select a word, with the possibility of associating a trigger key with any of these two actions. As for what the popup contains, it comes with a simplified definition as well as the word's pronunciation, which is a great addition. In case you want to further explore said word, that is possible as well by clicking the "More" button, which initiates a Google search for a comprehensive display of meanings. Supports a multitude of languages Other than that, you may also want to know that the Chrome extension can also store your word history so that you know precisely how the learning process has evolved over time. Regarding the languages the addon can provide definitions in, your choices are quite varied, with English, Chinese, Japanese, German, Russian, Korean, and Spanish being just a few of your options. Noteworthy educational resource All in all, Google Dictionary is a great means of enhancing your vocabulary since it can offer handy definitions for the words whose meaning does not ring a bell to

you. The add-on is not intrusive in any way, and adjusting its reactions so that you work with it in a comfortable manner is possible, and that makes a great companion when exploring text whose meaning you are unsure of. Description: On a web page, you may encounter some text that is written in a language which you do not understand. When you double-click or click on the selected text, a tooltip will appear. In the case of this article, you could ask: what is the meaning of “diversified”? Is this text something new? And that is a bit of a tough question to answer, since the terminology of today is quite different from what it was in the past, and in most cases, text written in a language you don’t know is more likely to appear in publications that are not about, for instance, technologies. Google Dictionary for Chrome is a browser extension that comes with a clickable button that will offer you a popup
