none I have a function that takes a list of numbers and returns a list How do I tell if I have a repeated number twice or not? Answer. Well, it depends on the function you are using. If you are using a simple function with a for loop, then you must use the same function twice. If you are using a function such as `strlen($val)`, then you can use `strlen($val)` twice, but only if there is only one character on the line where you are calling the function.
